Winter Forage Crop Seeds.

RYE.

The genuine Florida Rye cannot be surpassed for Winter forage. It can be cut three or four times during the Winter months and then go to seed in the Spring. It is better to keep it cut until all danger from freezing is past for if it has jointed it is more liable to get killed by a heavy frost.

Georgia and other northern seed may look better than the Florida, but are worthless where a forage crop is desired, so get the *Genuine Florida*, 75 cts pr pk, \$2.40 pr bu.
South Georgia, for lawns, 50 " " " 1.50 " "
